# China Construction Bank (Asia) Announces Net Profit after Tax of HKD221 Million for the First Half of 2008

**HONG KONG - September 29, 2008 -** China Construction Bank (Asia) Corporation Limited ("CCB (Asia)") today reported net profit after tax of HKD221 million for the first half of 2008.

During the first half of 2008, the bank achieved an impressive loan growth of 35% from the year end of 2007. Despite this remarkable total loan growth, net interest income declined by 19% or HKD81 million as compared with the same period last year, primarily attributable to net interest margin contraction due to higher funding costs in taking customer time deposits, issuing certificates of deposit and borrowing funds in the inter-bank market under the tight market conditions.

Non-interest income recorded a solid growth of HKD78 million or 38% as compared to the same period of last year, with across-the-board growth in revenue from investment and securities services, insurance services, foreign exchange and treasury related products. However, this income increase was entirely offset by the significant decline in net interest income. As a result, total operating income only recorded a small change as compared to that of the first half of last year.

Total operating expenses increased by 39% or HKD104 million over the same period last year, largely attributable to the increasing costs relating to integration in systems and operations, business and branch network expansion, and development of new products and services. In addition, loan impairment allowance write–back was lower than that of the same period of the prior year.

The bank's asset quality continued to be very satisfactory. The ratio of loans overdue for more than three months to outstanding loans was only 0.01% at the end of June 2008.

CCB (Asia) President and Chief Executive Officer Charles Ma said, "With the strong support of our parent China Construction Bank Corporation, we have remarkably expanded our operation, branch network and assets base. Being the retail and commercial banking platform of China Construction Bank Corporation for business expansion in Hong Kong and Macau, we'll continue our rapid growth strategy."

Ma added that their parent bank has recently approved an injection of USD800 million new capital into the bank in support of the bank's further branch network expansion, loan and asset growth, development of new products, systems and new lines of business and services.

"Since we are in the active expansion mode, it is expected that the expense level will be increasing in the next few years which will inevitably have short-term profitability impact for the bank." Ma remarked. "However, we believe the bank's overall earnings capability and competitive edge will be further enhanced in the long run with the expanded branch network and economy of scale, diversified loan and deposit mix, stronger and diversified customer base, and broadened range of products and services."

#### D. NOTES TO INTERIM FINANCIAL INFORMATION DISCLOSURE STATEMENTS

#### (1) BASIS OF PREPARATION

This interim financial information disclosure statements have been prepared in accordance with the same accounting policies adopted in the 2007 annual financial statements.

#### (2) BASIS OF CONSOLIDATION

The interim financial information disclosure statements cover the consolidated positions of China Construction Bank (Asia) Corporation Limited ("the Bank"), all its subsidiaries (China Construction Bank (Macau) Corporation Limited ("CCBMCL"), CCB Securities Limited and CCB Nominees Limited) and an associate (QBE Hongkong & Shanghai Insurance Limited) (collectively referred to as "the Group") up to 30 June 2008.

Unless otherwise stated, all financial information contained are prepared according to the consolidation basis for accounting purposes. In preparing the capital adequacy ratio of the Group, they are prepared according to the basis of consolidation for regulatory purposes. The main difference between the consolidation basis for accounting and regulatory purposes is that the former includes the Bank and all its subsidiaries and an associate whereas the latter includes the Bank and a subsidiary (CCBMCL) which conduct banking business.

### (3) STATEMENT OF COMPLIANCE

In preparing the unaudited interim financial information disclosure statements for the first half of 2008, the Bank has fully complied with the disclosure provisions of the Banking (Disclosure) Rules.

#### (15) DERIVATIVE FINANCIAL INSTRUMENTS

Derivatives include forward, swap and option transactions undertaken by the Group in the foreign exchange and interest rate markets. The Group uses of derivatives for proprietary trading and sale to customers as risk management products. These positions are actively managed through entering offsetting deals with external parties to ensure the Group's net exposures are within acceptable risk levels. No significant proprietary positions are maintained by the Group at the balance sheet date. The Group also uses derivatives, principally interest rate swaps, in the management of its own asset and liability portfolios and structural positions.

The credit risk weighted amount was calculated in accordance with the Banking (Capital) Rules and depends on the status of the counterparty and the maturing characteristics. The risk weights used range from 0% to 100% (2007: 0% to 100%) for exchange rate and interest rate contracts.

The Group did not enter into any bilateral netting arrangements during the period and accordingly these amounts are shown on gross basis.

### (d) Fair value of derivative financial instruments designated as hedging instruments

The following is a summary of the fair value of derivatives held for fair value hedges purpose:

	30 Jun	2008	31 De	31 Dec 2007		
	Assets HK\$'000	Liabilities HK\$'000	Assets HK\$'000	Liabilities HK\$'000		
Interest rate swaps		-	14,883			

The above interest rate swaps are used to hedge changes in the fair value of certain fixed rate liabilities due to movements in market interest rates. For the period ended 30 June 2008, the net gain on hedged items attributable to the hedged risk was HK\$725,927 (2007: net loss of HK\$4,604,878) while the net loss on hedging instruments was HK\$127,519 (2007: net gain of HK\$4,831,047).

	=======	========

The aggregate credit risk weighted amounts of the above off-balance sheet exposures are as follows:

	30 Jun 2008 HK\$'000	31 Dec 2007 HK\$'000
Credit risk weighted amounts	1,248,569 =======	1,002,820

Contingent liabilities and commitments are credit-related instruments which include letter of credits, guarantees and commitments to extend credit. The risk involved is essentially the same as the credit risk involved in extending loan facilities to customers. These transactions are, therefore, subject to the same credit application, portfolio maintenance and collateral requirements as for customers applying for the loans. The contractual amounts represent the amounts at risk should the contract be fully drawn upon and the client defaults. As the facilities may expire without being drawn upon, the contract amounts do not represent expected future cash flows.

The risk weights used in the computation of credit risk weighted amounts range from 0% to 100% (2007: 0% to 100%).

Core capital adequacy ratio	16.07%	21.54%
Capital adequacy ratio	16.08% ======	21.71%
	30 Jun 2008	31 Dec 2007

At 30 June 2008, the capital adequacy ratio was computed on a consolidated basis, including the Bank and its subsidiary, China Construction Bank (Macau) Corporation Limited, in accordance with the Banking (Capital) Rules. Deductions from total capital base include investments in certain subsidiaries, namely CCB Securities Limited and CCB Nominees Limited, which conduct non-banking related businesses, and their risk weighted assets have not been consolidated into the total risk weighted assets of the Group.

In calculating the risk weighted assets, the Group adopted the Standardised (Credit Risk) Approach and the Standardised (Market Risk) Approach for credit risk and market risk respectively. For operational risk, the capital requirement is calculated by using the Basic Indicator Approach.
