

FOR IMMEDIATE RELEASE

**CCB (Asia) achieves milestone in HKMA's Ensemble^{TX}
completes tokenized deposit transactions to support the tokenization
market development**

Hong Kong – November 13, 2025 – China Construction Bank (Asia) ("CCB (Asia)") announced that, with the support of the Hong Kong Monetary Authority ("HKMA"), it has successfully completed the validation of real-value tokenized deposit transactions under Ensemble^{TX}, the pilot phase of Project Ensemble. This milestone marks an important step in CCB (Asia)'s practical application of tokenization technology, providing valuable basis for tokenized deposits and asset transactions.

Ensemble^{TX} aims to promote tokenization applications and financial market infrastructure innovation, with a focus on exploring the use of tokenized deposits and asset transactions in real business scenarios. The HKMA continues to develop the project, including encouraging commercial banks to introduce tokenized deposits and facilitating real-value transactions of tokenized assets, such as the settlement of tokenized money market funds with tokenized deposits. As one of the participating banks, CCB (Asia) actively promotes tokenization innovation. Through the HKMA's established platform under Project Ensemble, the bank achieved cross-bank transfers of tokenized deposits with partner banks and successfully validated Payment versus Payment (PvP) settlement of tokenized deposits.

Mr. Zhang Jun, CCB (Asia)'s Vice Chairman and Chief Executive Officer, said, "Following our participation in the Ensemble Sandbox, CCB (Asia) is honored to further participate the pilot phase of Project Ensemble, Ensemble^{TX}. The successful validation of tokenized deposit transactions lays a solid foundation for future commercial applications of tokenization. Through close collaboration with the HKMA and other partners, coupled with the practical experience gained from this pilot, CCB (Asia) is committed to promoting tokenization technology to more markets and advancing the interoperability of infrastructure for tokenization. "

Looking ahead, CCB (Asia) will continue to expand in the field of financial technology, building a more open ecosystem for tokenization services, exploring in-depth applications of tokenization technology in diverse scenarios, and driving innovation development in payments and asset settlement. The bank remains committed to supporting the development of the tokenization market in Hong Kong and striving to consolidate Hong Kong's position as an international financial center.
